December 4, 2008

Addendum 2:  
**Local Area Network Cabling**  
**09-014**

1. What is the footage we are supposed to use for each school? A: No footages are recommended within the RFP. Each vendor will assess RFP and floor plans previously provided for most aggressive proposal.
2. What type of cable is to be used for each school? A: See addendum #1 or See Section 6 for complete details. i.e.; *Commscope/Uniprise 5504 or Ultra Pipe 6ECMP as specified.*
3. What connectivity is required for the AP end of the cable. Assume patch panel will be added in the closet and that rack space is available for same. A: See addendum #1
4. What type of projector mount are we using. A: This is a data cabling RFP. No projector materials are part of this RFP.
5. Will the district provide the projector and if so what is the mfg and model? A: District will provide projectors. This is a data cabling RFP. No projector materials are part of this RFP.
6. What wiring will be required? Once again we have done many but there are many solutions. A: District will provide projectors. This is a data cabling RFP. No projector materials are part of this RFP.
7. Will projector arms be used vs ceiling mount and if so need mfg info and who will provide mount. A: District will provide projectors. This is a data cabling RFP. No projector materials are part of this RFP.
8. Will promethean boards be used, if so, who will be responsible for the distance of the projector from the board calculation. Has been a problem in the past. A: Awarded vendor and district will finalize design during contract negotiations. Expected final throw distance will be between 10' and 14' from front. Cable termination will be required to have the standard service loop for projector mounting flexibility.

9. Can we have proposal forms in word? A: Yes, see attached word document.
