Addendum 1:
RFP: LOCAL AREA NETWORK CABLING, #08-025

1. Q: It is mentioned in section 17000 that the horizontal data cable type is Commscope/Uniprise 5504 (Category 5E) or Ultra Pipe 6ECMP (Category 6E) is acceptable. What specific type should be used for the WAP implementation?

A: Lead with 6E and submit a separate add alternate with 5E.

2. Q: Since racks are not mentioned in this section, is there available rack space to accommodate the patch panels and are patch cords required?

A: It is assumed that rack space is available or will be made available. Provide an alternate line item cost for an installed rack just in case a new rack is required. Include separate line item costs for 1000 7' and 1000 15' patch cords of 6E and add alternate 5E.

3. Q: Can we submit multimode fiber line item costs to replace faulty fiber if it exists?

A: Yes. Submit an alternate line item, turn key cost for 12 strands of multimode fiber with SC terminations. Telecom closets have been relocated in Pasadena High School and South Houston High School, so this may need to be addressed at these locations.
